Subject: Stanwyck Avionics Inc

Ref: KOBIAWOS Install/Maintenance

The purpose of this memo is to summarize our experience with the performance of Stanwyck Avionics with the installation and subsequent maintenance of our AWI AWOS-3 system. Our system was commissioned on March 4, 2008. Since that date we have had very little outage and we relate that performance to our maintenance support by Stanwyck Avionics. They are very responsive to phone calls either for advice or assistance to troubleshoot and isolate problems. If the problem results are such that they cannot be resolved over the telephone, Stanwyck will make a site visit.

We have had situations that resulted in our airport personnel shipping units to AWI for repair. This would have caused AWOS downtime and loss of service. In most of these situations, Stanwyck provided and installed a loner unit at no cost, in the interest of maintaining our AWOS on-line.

Stanwyck Avionics has also provided at no cost to the airport, equipment, software and support to display the AWOS data in a format more legible to the average pilot. In addition, our AWOS data is now forwarded to the National Weather Service at no cost to the airport.

In summary, our airport appreciates the fact that Stanwyck Avionics is very competent and responsive to our trouble calls and quarterly maintenance support.
